

# Natural Gas Patio Heaters

- Natural gas patio heaters extend the summer season.
- They can be permanently installed or used in a portable fashion.
- They use infrared heating, resulting in efficient, low-cost operation.

## Summer Lasts Longer with Natural Gas Patio Heaters

Summer never seems to last long enough, especially in New York and Pennsylvania. Extend your outdoor season with natural gas patio heaters available in permanent or portable styles. Once the sun goes down, don't let the cool night air put a chill on the festivities. Gas patio heaters are the perfect way to keep guests comfortable, whether it's on a deck, patio or poolside. Available in many different sizes and styles, gas patio heaters can keep the cool night air from ending your get-together too soon.

## Don't Forget About Convenience Outlets!

Natural gas convenience outlets make it safe and easy to connect and disconnect your natural gas patio heater without using tools. Safety features, such as an automatic shut-off valve, are standard on all gas convenience outlets. You will appreciate the flexibility convenience outlets provide, enabling you to best enjoy your outdoor living space.

## Advantages of Natural Gas Patio Heaters:

- Natural gas patio heaters are available in permanent or portable models.
- They have instant on/off capabilities.
- They have adjustable heat control.
- They heat areas up to 20-foot diameter circles.
- They are most effective at outdoor temperatures of 50 to 70° degrees Fahrenheit.
- They extend the use of your outdoor patio or deck to the colder months.
- They use infrared heating, which heats objects, and not the air, resulting in efficient, low-cost operation.
