

Field Completions Engineer – Brookville, PA

Seneca Resources Corporation, the oil & gas exploration and production subsidiary of National Fuel Gas Company (NYSE: NFG), is currently seeking a Field Completions Engineer at its East division office in Brookville, PA.

The Field Completions Engineer will serve as an integral member of the team with responsibilities including, but not limited to, the following:

- Develop, design and supervise completion procedures including TCP, plug & perf., coil tubing/snubbing drill outs and well testing associated with fracture treatments specified by stimulation engineer
- Prepare and track cost estimates
- Supervise field personnel on multiple locations
- Promote exemplary HSE practices
- Ensure accuracy of electronic well file
- Conduct post well analyses and recommended improvements to organizational best practices

This position requires a minimum of a bachelor's degree in petroleum or mechanical engineering along with 2 to 5 years industry experience preferably in operations including horizontal drilling and resource plays. The successful candidate must have knowledge and experience working with MS Office products as well as Wellview or similar electronic well database. The ability to be a team player emphasizing cost and efficiency improvements and solving problems as they arise is required.

Candidates responding to this posting must refer to the job title, Field Completions Engineer, or Requisition ID, #10-20PA, in their correspondence. For confidential consideration, please mail your resume, cover letter and employment references by June 14, 2010 to:
